KEY ACHIEVEMENTS

Improved System Integrity and Productivity

Enhanced system integrity and team productivity through effective security policy implementation and automation

LANGUAGES

ENGLISH Proficient ●●●●●
HINDI Proficient ●●●●●

SKILLS

- Active Directory & Azure Active Directory (Entra ID)
- DNS & DHCP Management
- Group Policy Management Console (GPMC)
- PKI (Certificate issuance, etc.)
- Windows Server (2008/2012/2016/2019/2022)
- PowerShell Scripting & Automation

DHARMENDRA KORI

ACTIVE DIRECTORY ADMINISTRATOR

SUMMARY

I'm a dynamic Senior **Active Directory** Analyst at HCLTech, specializing in **AD management and PowerShell scripting**. I've strengthened system integrity by implementing robust security policies and automating key processes, leading to improved compliance and a measurable boost in team productivity. With strong project coordination skills, I ensure client requirements are met on time while maintaining audit readiness through consistent documentation and policy enforcement.

EXPERIENCE

HCLTech LTD

Noida, INDIA

Senior Analyst

12/2020 - Current

A leading global technology company specializing in IT services.

- Administered and supplied comprehensive support for Active Directory (AD) and Azure AD environments, ensuring secure and efficient user and group management.
- Installed and deployed security patches for Windows Server operating systems, strengthening system security and compliance.
- Developed and implemented PowerShell scripts for:
 - Automated AD object management and cleanup.
 - Account and password expiration notifications to proactively inform users.
 - Client secret and certificate expiration alerts, ensuring timely renewals.
 - Notifications for interactive service account password resets, improving security compliance.
 - Microsoft 365 license management, optimizing allocation and cost efficiency, etc.
- Developed a custom PowerShell-based GUI module, streamlining AD administration.
- Provided technical assistance to end users, troubleshooting Active Directory, Azure AD, and GPO-related incidents to ensure smooth operations.
- Configured, monitored, and maintained DNS servers, ensuring optimal name resolution and network reliability.
- Managed DHCP configurations, including IP scope creation, reservations, and lease management to ensure seamless network connectivity.
- Troubleshooted and resolved DNS and DHCP issues, reducing downtime and enhancing network performance.
- Implemented and enforced Group Policy Objects (GPOs) to enhance security and streamline user access management.
